

When an Officer is down
or in trouble
Grace Industries'
Wireless PA 1000
can summon assistance 3 ways:

1. Silent Alarm Signaling
2. Emergency Audible Signaling
3. No Bodily Movement

Central Control will receive
audible and visual alerts
of an alarm condition
Help can be sent immediately!

New Technology
To Protect
Correctional Officers

**WIRELESS
PERSONAL
ALERT MONITOR**

Wireless Technology to Protect Correctional Officers

Correctional Officers work in one of the most dangerous environments on earth. If they encounter a hostile situation or become injured or incapacitated they'll want help to be on the way as soon as possible.

Using advanced wireless technology, Grace Industries, Inc. has virtually eliminated the high costs associated with hard wiring or retrofitting correctional facilities with the GEM System™.

Check out the GEM System's™ life-saving features:

1. It's wireless and portable. A perfect fit for new or existing facilities.
2. Each system can protect up to 800 Officers (can be special ordered to accommodate 1,584 officers).
3. The GEM System™ is affordable for any sized correctional institution or jail.
4. The GEM System™ is engineered to provide years of trouble free service.

The GEM System™, featuring the PA 1000 wireless Personal Alarm Transmitter, gives your officers protection they deserve. Now you can make this technology work for you!

GEM SYSTEM™ BASE RECEIVER

RANGE: Up to 1/2 mile depending on limiting factors and environmental conditions.

ALARM CONDITION DISPLAY: All models offer a vocal message and alarm warning lights. Personnel information is displayed on a Liquid Crystal Display screen.

EXTERNAL POWER OPTIONS: 120 - 240 volts AC, with auto charge feature. Also comes with 12 volt DC cigarette lighter type power plug.

CASE: Rugged, impact resistant ABS carrying case in Black or Safety Yellow. Unit is totally portable.

The rugged and dependable PA 1000™ Transmitting Personal Alert Monitor offers these life safety features:

PA 1000™ PERSONAL ALARM TRANSMITTERS

RADIO: Ultra Efficient Spread Spectrum 902-928 MHz band. No FCC license required.

AUDIO OUTPUT: 98+ dBA with attention getting sound signature in alarm mode.

DIMENSIONS: Only 2" wide x 3-1/4" high x 1-1/8" deep. Weight is 8 oz. with battery.

VISUAL: Flashing LED display indicates mode of operation when unit is active.

MOTION DETECTOR: Solid state accelerometer.

POWER: 9 volt alkaline (Duracell MN 1604 recommended). Average battery life - 50 hours (motion sensing; 3 to 4 months (non-motion sensing))

CASE: High strength polycarbonate case.

The PA-1000™ offers both silent and audible signaling. These Personal Alert Monitors are lightweight and durable, and provide Correctional Officers with a critical 'Link To Safety'.
